Approx **720** (4″×6″) sheets/hr	Approx **1,440** (4″×6″) sheets/hr

High Quality and Versatile Printing Service

Newly developed 6 colored unique "VIVIDIA" dye inks for beautiful reproductions

The newly developed "VIVIDIA" ink system which uses a unique colorant that is light and Ozone resistant. "VIVIDIA" ink system realizes enhanced granularity and gradation, producing remarkable improvements in medium density areas such as skin tones, blue skies, gradient backgrounds.

VIVIDIA Cyan Magenta Yellow Black Sky Blue Pink

Image Intelligence™ —FUJIFILM's Superior Image processing

FUJIFILM's proprietary image processing technology, Image Intelligence™ automatically compensates for problematic conditions ,such as poor lighting, excessive backlight, high contrast, underexposure or overexposure.

Image Intelligence™

Superior image quality using exclusive paper

"FUJIFILM Quality Dry Photo Paper" enhances the overall color saturation to produce vivid color.

### Supported various paper size and paper type

The Frontier-S supports a variety of paper sizes up to 8″×39″ (203×1,000mm) and two paer types Glossy / Luster

Exceptional space saving and Easy maintenance

Minimum of shop space required

required footprint is only 2.23 Ft^2 (0.19㎡).

0.19 m^2

460mm
430mm

Easy maintenance

Ink cartridges and roll paper are replaced easily just by opening the front covers to replace them.

Frontier-S DX100　Main specifications

Print method	Piezoelectric inkjet system	Paper loading	1 roll paper feeder
Print size	(5″×3.5″) 127×89mm to 210×1,000mm	Paper type	Glossy / Luster
Print speed	10 seconds per 1 sheet (4″×6″), *standard mode	Ink cartridges	6 Colors (C, M, Y, K, SB, P) of dye based ink (Volume : 200ml per color)
Print resolution	Standard mode 720×720dpi　High Quality mode 720×1,440dpi		
Roll paper	Paper Length : 65m (213″) Width :102mm (4"), 127mm (5"), 152mm (6"), 203mm (8"), 210mm	Power requirements	100v ~ 220V (50/60Hz) single-phase two-wire
		Weight	Approx. 23kg (include roll paper and ink cartridge) 51lbs
