

Robust, satin matt polyester film with a gloss silver back for indoor rollups. Suitable for waterbased dye- and pigmented inks

Display Films

euromedia RollUp Film Advanced wb

The robust euromedia RollUp Film Advanced wb with a satin matt coating and gloss silver back has been designed for use in rollup systems. The 175 micthick polyester film reproduces excellent print quality with brilliant colours. The satin matt surface guarantees photorealistic print and colour reproduction without annoying reflections. The gloss silver, scratch-resistant back rounds off the material s outstanding look and produces 100% opacity.

The very delicate looking RollUp Film Advanced wb also has excellent lie-flat properties in use and an attractive price-performance ratio. A special non-slip coating on the back ensures trouble-free printing. Do you need a high quality, totally scratch-resistant display film for demanding long-term use? If so, have a look at our euromedia RollUp Film Universal for water-based dye-based and pigmented inks. Are you looking for a display film for short-term applications and with a good price-performance ratio? If so, use euromedia RollUp Film Standard in the version for solvent, latex and UV inks or for water-based pigmented and dye-based inks.

Hints & Tips

Finish euromedia RollUp Film Advanced wb for an even higher quality look and greatest mechanical protection by using Ultra HighProtection gloss, matt or crystal sand laminate. Roll up loosely with the print side facing outwards for transport. This will ensure that the whole graphics including the laminate remain intact

euromedia RollUp Film Advanced wb

Product Properties

Applications

- indoor

Properties

- PVC-Free
- Blockout

Processing Tips

We basically recommend that the print is left to dry out for 24 hours before finishing.

Storage

The product should be stored in its original packaging at a room temperature of 15°C - 25°C and 40 - 60% relative humidity.

Specifications

Material	Polyester
Ink	Waterbased inks
Gloss Level	Satin matt
Back	Silver glossy
Thickness	175 mic
Weight	215 g/m ²
